

Comments

The comment tag (`<!--Comment-->`) is used to insert comments in the HTML code.

It is a good practice of coding, so that coder and the reader can get help to understand the code.

It is useful to understand steps of the complex code. The comment tag is helpful while the debugging of codes.

- It is a simple piece of code that is wiped off (ignore) by web browsers i.e. , not displayed by the browser.
- It helps the coder and reader to understand the piece of code used for especially in complex source code.

Syntax:

```
<!-- Comments here -->
```

Types of HTML Comments

There are three types of comments in HTML which are:

- 1) Single-line comment
- 2) Multi-lines comment
- 3) Using `<comment>` tag

➤ Single-line comment

Single line comment is given inside the (`<!-- comment -->`) tag.

Example:

```
<!DOCTYPE html>

<html>

<body>

    <!--This is heading Tag, It wont be displayed by the browser -->

    <h1>Topper World</h1>

    <!--This is single line comment,It wont be displayed by the
    browser -->

    <h2>This is single line comment</h2>

</body>

</html>
```

Output:

Topper World

This is single line comment

➤ Multi-line comment

Multiple lines can be given by the syntax (`<!-- -->`), Basically it's the same as we used in single line comment, difference is half part of the comment (`" -->`), is appended where the intended comment line ends.

Example:

```
<!DOCTYPE html>
<html>
<body>
    <!-- This is
        heading tag -->

    <h1>Topper World</h1>
    <!-- This is
        multi-line
        comment -->

    <h2>This is multi-line comment</h2>
</body>
</html>
```

Output:

Topper World

This is multi-line comment

➤ Using <comment> tag

There used to be an HTML <comment> tag, but currently it is not supported by any modern browser.

Example:

```
<!DOCTYPE html>
<html>
<body>
    <comment>This is heading tag</comment>

    <h1>Topper World</h1>

    <comment>This is multi-line
        comment
    </comment>

    <h2>This is a comment using</h2>

</body>
</html>
```

Output:

This is heading tag

Topper World

This is multi-line comment

This is a comment using

Note: The <comment> tag is not supported by modern browsers.
